PROFILE

Final-year B.Tech ECE student at IIIT Surat, software developer, and AI/ML enthusiast with professional experience as an AI Data Training Specialist, evaluating multi-domain data used to train large language models. Experienced in building end-to-end software using React, Next.js, REST APIs, NLP, databases, Docker, Linux, and cloud platforms. Strong problem-solving foundation with 1,500+ algorithmic problems solved and hands-on ownership from planning and development through testing, debugging, and deployment.

EDUCATION

Indian Institute of Information Technology, Surat
B.Tech in Electronics and Communication Engineering

2023 - 2027
CGPA: 8.12/10

Kendriya Vidyalaya ITBP, Karera, Madhya Pradesh
CBSE: Class XII (Senior Secondary)
CBSE: Class X (Secondary)

2019 - 2022
XII: 89.4%
X: 94.6%

EXPERIENCE

XelronAI
AI Data Training Specialist

Mar 2026 - Jun 2026
Remote

- Evaluated multi-domain prompt-response data for LLM training using factual verification, instruction-adherence checks, and rubric-based reviews to improve training-data reliability.
- Partnered with ML engineers and reviewers to resolve edge cases and refine evaluation guidelines, producing more consistent decisions across quality-review workflows.
- Translated complex requirements into repeatable checks and clear documentation, strengthening testing discipline and communication across a remote team.

PROJECTS

Interactive Developer Portfolio | *Next.js, TypeScript, WebGL*

[GitHub](#) | [Live](#)

- Built and deployed a responsive portfolio with Next.js, TypeScript, and Tailwind CSS to present projects, skills, experience, achievements, and contact flows in a reusable interface.
- Created a Spline/WebGL 3D skill keyboard, GSAP animations, and an interactive frame-based avatar; optimized WebP assets and validated responsive layouts, TypeScript checks, and production builds before Vercel deployment.

Smart Hiring & Resume Scoring | *React, FastAPI, NLP, AI/ML*

[GitHub](#)

- Built candidate and recruiter workflows for resume upload, job matching, application tracking, and automated screening in a full-stack React and FastAPI application.
- Developed an NLP pipeline for semantic matching, skill extraction, missing-skill analysis, and candidate ranking, exposed through REST APIs and recruiter dashboards.

Voronoi WSN Scheduler | *React, Flask, Docker, Machine Learning*

[GitHub](#) | [Live](#)

- Developed a full-stack wireless-sensor-network simulator with Voronoi scheduling, backup-node selection, and fault-recovery workflows to study network lifetime under failures.
- Built interactive React dashboards for data analytics and performance comparison under node failures, then containerized the application with Docker for reproducible deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL

Frontend: React.js, Next.js, HTML/CSS, Tailwind CSS, GSAP, Spline (WebGL), Responsive Design, UI/UX Design, Web Animations

Backend & AI: Node.js, FastAPI, Flask, REST APIs, Scikit-learn, OpenAI API, NLP, LLM Evaluation

Data & Infrastructure: PostgreSQL, MySQL, SQLite, Firebase, Docker, AWS, Linux, Raspberry Pi

Developer Tools: Git, GitHub, Postman, Vercel

ACHIEVEMENTS

- **Competitive programming:** **LeetCode** peak rating **1992 (Knight)**, **Codeforces** peak rating **1427 (Specialist)**, and **1,500+** problems solved across platforms.
- Ranked **606th** among 40,000+ participants (top 1.6%) in LeetCode Weekly Contest 510.
- Won the AI Prompt Engineering Competition at Google Developer Group (GDG) Indore in a live prompt-design and problem-solving challenge.
- Designed and self-hosted a live quiz platform that demonstrated system reliability while supporting **140+** concurrent students with zero downtime during the event.
